

WHO ARE WE? - OVERVIEW

- ✓ **CJR Renewables** is a global service provider in the renewable energy sector and part of a large Portuguese conglomerate.

- ✓ **Camelthorn Business Ventures** founded in 2011 to pursue impact investing in Namibia in affordable housing and renewable energy.

- ✓ **TeSik Group** is a Namibian corporation active in manufacturing, construction, renewable energy, engineering and project management.

Omukwa Renewable Ventures (ORV) is a newly established strategic alliance of the three (3) organizations targeting Namibia & SADC for the development of REN initiatives.

WHO ARE WE? – OMUKWA JOINT EXPERIENCE

Our **EXPERIENCE** as an alliance:

- 50 years track record with a focus on construction of infrastructure and urban renewal;
- Developed more than 250 projects mainly in PV and Wind across three (3) continents;
- We operate as an EPC as well as an IPP / Investor;
- Operating in the Namibian REN market since 2012;
- Successful development and construction of a 5MWp PV plant in Outapi (REFIT);
- Currently developing a 5MWp PV plant in Katima Mulilo.
- Successfully designed & supervised several multi-million dollar infrastructure projects.

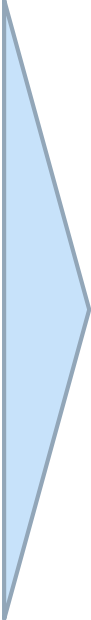

ORV has proven experience of implemented projects both locally & internationally

WHO ARE WE? – OMUKWA JOINT COMPETENCIES

Our **COMPETENCIES** as an alliance:

- Successful investor (IPP) in REN projects;
- EPC of large REN projects worldwide mainly in PV and Wind;
- EPC of power equipment and substations;
- Design & Construction of large infrastructure and urban renewal projects;
- Development / investment in complex construction projects;
- Financial Structuring;
- Impact Investing;
- Construction Supervision & Contract Administration;
- Project Management;
- Local & international industry knowledge & networks.

ORV has full range of competencies to develop & execute complex investment initiatives from early stages to implementation & running operations

WHO ARE WE? – OMUKWA TARGET MARKETS

Our **OBJECTIVES** as an alliance:

- **Participating in public and private bids** for Wind, PV, Biomass, Mini-Hydro, storage systems for REN plants, stand-alone storage systems and other related sectors;
- **Negotiating direct bilateral off-taking contracts** and other kind of commercial partnerships with private companies for the supply of renewable energy (i.e. MSB, wheeling);
- Explore various power supply opportunities, with an **IPP scheme**, targeting **international Clients** from the Southern African Development Community (SADC);
- **Development projects (greenfield or brownfield)** of other types of infrastructure with similar financial profiles.
- **Generate employment opportunities** for migration of labour force and/or generation of new jobs both in REN & other infrastructure sectors.
- Generate a **positive and sustainable financial & social return** in its direct investments.

ORV seeks to penetrate private & public REN projects on all levels in Namibia & SADC.
